

# Drip Line Fittings

## Product Features

Good Seals

## Applications

Agriculture

Horticulture

## Product Options

Start Connectors

Insert Couplings

Insert Reducers

Line End Clamps

Rivulis Irrigation is making a good connection in the field with drip line fittings. From an extensive line of barb fittings, reducers, elbows, and adapter, we've got the fitting for you. Because the fittings are so well engineered, they create a good seal and have a grip that's hard to break. The drip line fittings are available in multiple sizes, matching up with 12, 16, 17, and 20 mm drip line and hose sizes. From the connection to the manifold or to the end of the line, we've got your covered.

## Drip Line Fittings

Image	Item description	Bag quantity	Box quantity	Item reference
	<b>Start Connectors</b>
